

RETRO Y2K ICON PACK

★ SET-UP GUIDE ★

Thank you so much for your purchase! ♥

This guide shows you how to set up your new icons on
iPhone, iPad, Android & more — step by step.

100+ ICONS

2 THEMES

WALLPAPERS

APK

What's in your download

- [/pink/icons/](#) — 100+ app icons, sweet pink theme (PNG)
- [/classic/icons/](#) — 100+ app icons, classic Win98 navy theme (PNG)
- [wallpaper_pink.png](#) & [wallpaper_classic.png](#) — matching home-screen wallpapers
- [Retro-Y2K-Icons-pink.apk](#) & [...-classic.apk](#) — 1-tap installers (Android only)
- This guide ♥

💡 All icons are transparent PNG — they look great on any wallpaper, and you can even use them as cute stickers in journals, Notion, Canva, etc.!

First: get the files onto your device

1. **Phone:** download the ZIP in your browser → open your Files app → tap the ZIP → **Extract**.
2. **Computer:** unzip, then AirDrop / cable-transfer the icons & wallpaper to your phone.
3. Tip: move the icons folder into **Photos / Gallery** so they're easy to pick later.

Step 1 — Set your wallpaper

This instantly gives you the retro desktop vibe, even before the icons!

iPhone / iPad

1. Save [wallpaper_pink.png](#) (or classic) to Photos
2. Settings → **Wallpaper** → Add New Wallpaper → Photos → pick it
3. Turn OFF "Perspective Zoom" so it stays sharp → Set

Android

1. Open the wallpaper in Files / Gallery
2. Tap  (menu) → **Set as wallpaper** → Home screen

♥ Mix & match — Pink wallpaper with Classic icons, or any combo you like!

iPhone & iPad — custom app icons

iOS uses the free built-in **Shortcuts** app. Do this for each app you want to theme:

1. Open the **Shortcuts** app → tap + (top right)
2. Tap **Add Action** → search **Open App** → choose it
3. Tap **Choose** → pick the real app (e.g. Instagram)
4. Tap the ▼ / **share icon** at the top → **Add to Home Screen**
5. Tap the little icon image → **Choose Photo** → pick our icon (e.g. **instagram.png**)
6. Edit the name (or delete it for a clean look) → **Add**
7. Repeat for your favourite apps — then move the originals into the App Library ♥

⚠ On iOS the icon opens the app through Shortcuts, so there's a tiny flash, and custom icons can't show the red notification badge. This is an Apple limitation (true for every icon pack).

iPhone — widgets (optional)

Want the weather / clock / photo widgets to match? Use the free app [Widgetsmith](#):

1. Install [Widgetsmith](#) from the App Store
2. Create a widget → choose **Photo** → pick a wallpaper crop or icon as the background
3. Add the Widgetsmith widget to your Home Screen (long-press → + → Widgetsmith)

The included wallpaper already has cute "welcome.exe" & "nowplaying" windows baked in — so even without widgets, your screen looks complete!

Android — easiest: the 1-tap APK

We include an installer that themes lots of apps at once. (Most shops don't give this!)

1. Tap **Retro-Y2K-Icons-pink.apk** (or classic) to install
2. If it says "unknown source / Play Protect" → tap **More details** → **Install anyway** (it's safe — just images, no permissions)
3. Apply it in your launcher:

Nova / Lawnchair / Smart Launcher: Settings → **Icon style / Icon pack** → choose **Retro Y2K**

Samsung (Good Lock → Theme Park): Icon → **Iconpack** → choose Retro Y2K → Save → Apply

4. Wait a few seconds for the home screen to refresh — done! ✨

 Samsung's Theme Park only themes apps that are in the pack (it doesn't support the "frame other apps" feature). For 100% coverage, a launcher like Nova or Lawnchair works best.

Android — per-app (use the PNGs)

No launcher? Use the free app [X Icon Changer](#) to set icons one by one:

1. Install [X Icon Changer](#) from Play Store
2. Open it → pick an app → [Change icon](#) → [Photos/Gallery](#)
3. Choose our icon (e.g. [classic/icons/youtube.png](#)) → Save → it adds a themed shortcut

Or with a launcher (per-app)

In Nova/Lawnchair: long-press an app → [Edit](#) → tap the icon → [Gallery / Custom](#) → pick our PNG.

Tips & FAQ

Desktop (Windows / Mac)

Right-click a folder/shortcut → Properties/Get Info → change the icon → pick a PNG
(Windows: convert to .ico with a free online tool first).

Quick answers

- **Can I mix themes?** Yes! Pink + Classic together looks great.
- **An app isn't in the pack?** Use the iconback frame (launchers) or skip it — your call.
- **Icons look blurry in a file viewer?** They're sharp — some viewers just preview small. They'll be crisp once applied.
- **Use as stickers?** Absolutely — the transparent PNGs work in journals, Canva, Notion & more.

Need help? Message us anytime through Etsy — we're happy to help you set it up!
